

Statement of Purpose

I would like to introduce myself as **[Applicant Name]**, son of **[Parents' Name]**, a permanent resident of **[Address]**, currently residing in Sanepa, Lalitpur, Nepal. I was born on **[Date of Birth]**. I have a strong interest in building a long-term career in the rapidly evolving field of information technology. For this reason, I am determined to pursue a **Bachelor of Information Technology (BIT)** at **[University Name]** to enhance my professional skills and career growth.

Regarding my academic background, I completed my **SLC in 2023 AD** with a GPA of **[GPA]** from **[School Name, Address]**, followed by **10+2 (Science) in 2025 AD** from **[College Name, Address]** with a GPA of **[GPA]**. With the intention of continuing my higher education abroad, I prepared for the IELTS examination and appeared on **[Date]**, achieving an overall score of **[Score]**. Afterward, I explored various universities and colleges worldwide for a Bachelor's degree in Information Technology and ultimately decided to pursue my studies in Australia.

During my research through official websites and educational resources, I found Australia to be a more suitable destination for higher education compared to countries such as the UK and the USA. Australian education places strong emphasis on practical learning, industry exposure, and project-based study. Degrees awarded by Australian institutions are internationally recognized and valued by employers and academic bodies worldwide. In contrast, the education system in Nepal is largely theory-oriented and based on outdated curricula, with limited exposure to modern technologies. Australian institutions adopt emerging technologies quickly and provide instruction through qualified and experienced faculty, ensuring students gain relevant practical skills.

I also considered European countries such as Germany, Finland, Denmark, and Austria; however, most of these destinations require proficiency in local languages, which demands additional time and effort. Furthermore, Australia offers a safe environment, cultural diversity, high living standards, and opportunities for international students to gain work experience after graduation through **Post Study Work (PSW)**. I am aware that Australia follows the **ESOS Act 2000** and provides **Tuition Protection Services (TPS)**, which ensures student rights and fee security. After reviewing information from official sources such as www.homeaffairs.gov.au and www.studyinaustralia.gov.au, I am confident in my decision to apply to Australia.

I have chosen not to pursue my higher education in Nepal due to limitations within the local education system. The curriculum is outdated, politically influenced, and lacks sufficient practical training. There are limited universities offering IT programs, including Tribhuvan University, Pokhara University, Kathmandu University, and Purwanchal University, with restricted course options that do not fully meet international standards. Admission processes are lengthy and competitive, often causing delays in academic progression. Additionally, degrees

awarded by Nepali universities have limited global recognition, which restricts international career opportunities.

I am particularly interested in studying in **Melbourne**, as it is recognized globally as one of the most livable cities, offering excellent infrastructure, healthcare, education, and cultural diversity. Melbourne is also ranked among the world's top student cities, providing an ideal academic and living environment for international students.

After evaluating various education providers, I found **[University Name]** to be the most suitable choice in terms of academic quality, affordability, student support, and location. The university is CRICOS-registered and meets Australian quality standards for international education. Its course structure emphasizes hands-on learning and industry-relevant skills, which aligns with my career goals. I also reviewed alternative universities such as Southern Cross University and Charles Sturt University; however, their tuition fees were comparatively higher. According to **The Good Universities Guide**, computing and IT students rate **[University Name]** highly for student support and overall experience.

Information Technology is a diverse and growing field that influences nearly all aspects of modern life. Careers in IT require analytical thinking, technical skills, and continuous learning. Upon completion of my degree, I aim to pursue roles such as Network Administrator, Systems Analyst, Database Administrator, or IT Support Specialist. I also plan to utilize the **Post Study Work (PSW)** opportunity to gain international practical experience. Afterward, I intend to return to Nepal and contribute to the growing IT sector by working with reputable companies such as Mercantile, WorldLink, and Subisu.

I have chosen the **three-year full-time Bachelor of Information Technology (Networking and Security)** program, as it provides comprehensive knowledge and practical exposure in network management and security systems. I understand the financial responsibilities involved, including tuition fees of approximately **AUD 11,850 per semester (excluding scholarship)** and living expenses of around **AUD 600 per month**. My academic background in science, including mathematics, has prepared me well for this field of study.

Upon successful completion of my degree and PSW experience, I plan to return to Nepal to pursue my professional career. Nepal's IT sector is expanding, with increasing demand for skilled IT professionals in government institutions, private organizations, and multinational companies. With international education and experience, I believe I will be able to secure suitable employment and contribute meaningfully to national development.

I am fully aware of the visa conditions and responsibilities associated with being an international student, including maintaining academic progress, attendance requirements, work limitations, and compliance with university and visa regulations.

If granted the opportunity to study at **[University Name]**, I assure you that I will remain committed to my academic goals and represent myself as a responsible and dedicated international student.

Thank you for considering my application.

Sincerely,
[Applicant Name]
